

# ADA Compliance Signage

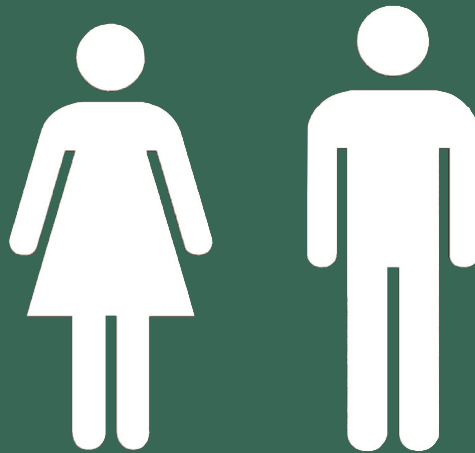

Precision Molded Panel Inserts and Frames

**NEW!**

## Colors! Colors! Colors!

### Pictogram

Figures Raised 1/32".  
The Pictogram area  
must be 6" minimum  
height.

### Finish and Contrast

Matte eggshell, or non-glare finish.  
Dark color background with light color letters or light color background with dark color letters.

### Letters

5/8" High uppercase Helvetica Medium, raised 1/32" and placed directly below the Pictogram.

### Braille

Grade 2 Braille raised 1/32" above the panel surface blends with the panel background color.  
(white braille is for illustration purpose only)

Title III of the Americans with Disabilities Act (ADA) outlines requirements for accessibility of public places for the disabled. The law outlines requirements for new and existing construction, renovation and alterations. All existing public facilities must take "readily achievable" steps toward removing any barriers that do not comply with the law. Barrier removal includes signage, one of the most cost effective and readily achievable steps toward compliance.

Our Regulatory Signs are designated to meet the new Federal regulations for the visually impaired and comply with ADA code for raised text and pictograms, Grade 2 Braille and contrasting colors.

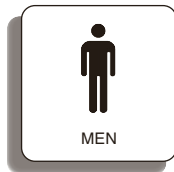

Our in-stock ADA regulatory signs are available in a variety of non-glare or matte-finish colors with contrasting raised lettering and image relief areas. These signs may be mounted without the frame or inserted in our precision molded frame to suit the aesthetics of the location.

*Classic Architectural Signage* supplies you with durable high quality signs that are easy to wall mount with pressure sensitive adhesive.
